

Tuu Network

The **Tuu Network** comprises a number of **Tuu 360** or **Tuu PTZ cameras**, or a combination of both, together with a PoE switch and an NVR programmed with VMS software.

The **Tuu 360 cameras** transmit the entire 360° views in a 12mp fisheye video format and the **Tuu PTZ cameras** transmit HD video to the NVR via the network and PoE switch. The cameras have integral IR illumination for day and night viewing. All Tuu cameras are powered via a PoE switch.

The free viewer software de-warps the 360° fisheye format into a standard viewing format for a selected segment in real-time or from recorded video.

Revader Security's Tuu products are designed for harsh IP68 environments with a wide temperature range. The cases are machined from solid aluminium protected by an epoxy paint finish (also available in stainless steel) and the viewing windows are manufactured to IK10 standards. Wall, pole and ceiling mounting brackets are made from stainless steel.

Tuu cameras are easily removed for deep immersion cleaning and can be easily added or redeployed in other locations, making the networks extremely flexible.

Revader Security's team of engineers are happy to advise on network or system design, including storage calculations and can supply all network components pre-configured as part of its free customer service. Remote access can be installed for remote viewing or resolution of system configuration issues.

Typical applications:

- ▶ Slaughterhouses/ abattoirs
- ▶ Industrial clean rooms
- ▶ Medical isolation units
- ▶ Laboratory environments
- ▶ Construction sites, farms, goods vehicles
- ▶ Cargo ships, marinas, yachts and ferries
- ▶ Open spaces - e.g. parks, car parks
- ▶ Scene of crime recording
- ▶ Exposure to extreme weather
- ▶ Military installations & operating bases

Benefits include:

- ▶ Rapid installation & redeployment to meet changing security demands
- ▶ Rugged construction: impervious to water, vibration, shock, biohazards, temperature, dust and impact
- ▶ Easily integrates into existing CCTV systems
- ▶ HD video
- ▶ Integral IR for day and night operation
- ▶ Rapid demount for deep cleaning
- ▶ Operates in marine conditions
- ▶ Functions submerged in up to 1.5m water
- ▶ Use in any environment from desert to tundra
