

# Heatshield

Heatshields are available for both the Revader Tuu and Transit models.

Heatshields improve product cooling by utilising thermodynamic principles to create efficient internal convection between the heatshield and the product.

This increases the ambient temperature range within which the Transit and Tuu units are able to operate.

Part No.	Description
60995	Heatshield for Transit models
60636	Heatshield for Tuu models
